MOTORCYCLE AIR SUSPENSION

PRODUCT CATALOG 2020

TRANSFORMING HOMEGROWN PASSION INTO PREMIUM PRODUCTS FOR OVER THREE DECADES

Arnott Air Suspension's humble beginnings can be traced back to 1989, when founder Adam Arnott developed his first air suspension replacement product to fix his father's car in their family garage. Soon after that pivotal moment, the pair's talent for engineering and passion for a great ride led to quick recognition throughout central Florida, and explosive growth for the company. They began designing and manufacturing high quality products for a wide range of luxury automobiles, and quickly established the Arnott name as the global leader in air suspension replacement products. Armed with years of expertise and success with luxury suspension systems, and their deep passion for riding motorcycles, the company designed its first adjustable air suspension kit for motorcycles in 2008.

AMERICAN-BORN INGENUITY, GLOBAL LEADERSHIP

Our team of expert engineers, machinists and technicians operate out of a state of the art 20-acre facility in the heart of Florida's Space Coast, which includes a dedicated 60,000 square foot Research and Development Center. Also housed in our North American headquarters is our Customer Service team – superior technical support is always available when you need it. With a worldwide network of trusted distributors and a newly in the EU, we bring American talent and passion for air suspension to the world. Our team works every day to build on the trust and quality the Arnott name has signaled to our customers for over 30 years.

**UPGRADE YOUR BIKE WITH AN ARNOTT MOTORCYCLE AIR SUSPENSION SYSTEM
AND ELEVATE YOUR RIDE[®]**

ENGINEERING A BETTER RIDE YEAR AFTER YEAR WITH TRUAIR[®]

Each year, Arnott continues to build on the passion behind our very first motorcycle kit. Expanding from that original design for the Harley-Davidson[®] Touring models, our family of motorcycle products has grown to include over 55 kits across seven brands. We design and handcraft air suspension systems specifically for YOUR motorcycle, ensuring your system exceeds the highest standards in quality, functionality and safety. Each component is developed by suspension engineers to provide riders with the best experience possible:

- ◆ Our patented TruAIR[®] technology featuring a custom-valved monotube shock
- ◆ Engineered exclusively for motorcycles – not a modified automotive part
- ◆ Fast and flawless installation, with in-depth tutorial videos
- ◆ Quick on-board height adjustability for easy lowering when stopping or parking
- ◆ Reduced bottoming and improved safety
- ◆ The ultimate comfort of customized air pressure
- ◆ Handcrafted in the USA from Tier 1 components, ensuring a smooth ride for years to come
- ◆ Luxury within reach – high-quality upgrade to your bike at an affordable price

ULTIMATE RIDE SERIES

Avoid rider fatigue and strain with Arnott's Ultimate Ride Series. These kits lower your motorcycle on demand for ease and comfort - meaning more enjoyment on those long weekend rides.

The Ultimate Ride Series features:

- FOX® Street Performance monotube shocks
- Advance high-flow, deflective disk, velocity-sensitive damping
- Multi-ply Goodyear® air bladder for height adjustability and air spring firmness
- Protective cans to shield the air bladder from dust and debris
- Powerful compressors with application-specific mounting hardware
- Handlebar-mounted inflation control switch
- Optional rebound control enables the rider to adjust the internal damping of the shock for a smooth ride

Arnott Air Suspension kits for:
HARLEY-DAVIDSON® SOFTAIL®

NEW KITS FOR THE M8 SOFTAIL

In 2018, Harley-Davidson® radically revamped the Softail by combining the popular old school look of the previous version with the handling and comfort of the Dyna® to produce an all-new line of bikes. This new line replaces the horizontally mounted rear suspension of the Softail and exposed dual shocks of the Dyna with a single mono shock. Arnott engineers immediately improved the new cruiser’s rear suspension by designing a fully adjustable FOX® mono shock and air spring that can be controlled with an on-board compressor and inflation switch, providing exceptional ride quality, confident control while stopped and enhanced safety.

ARNOTT TRANSFORMS GOOD RIDES INTO GREAT RIDES

Our second-generation air suspension kits for 2001-2017 Softail models provide maximum adjustability for better lowering capabilities, and smoother ride quality. At the core of this patented system is a custom nitrogen-charged FOX® shock absorber complemented by a separate Goodyear® air spring in a protective case. The Arnott kit inflates the air spring with a large compressor, which is mounted to the regulator/rectifier and protected by an attractive chin spoiler.

ARNOTT VERSUS THE COMPETITION

PATENTED TRUAIR® TECHNOLOGY OUTPERFORMS OE SHOCKS

Today, many touring bikes include stock air-assisted, or may be “upgraded” with air-cylinder shocks. These inferior shocks are not as responsive to road conditions as our TruAIR® air suspension – and yield a ride that’s far from comfortable.

Arnott Ultimate Ride Shock

- ♦ Bikes equipped with TruAir® have superior handling, and can be quickly lowered while stopping
- ♦ The powerful on-board compressor can inflate the suspension to your desired pressure in seconds.
- ♦ Designed with safety in mind, with hydraulic shocks to dampen the impact of road imperfections

DON'T LET A 4-WHEEL SHOCK RUIN YOUR 2-WHEEL RIDE

While many other brands simply repurpose automotive shocks for motorcycle use, Arnott designs TruAIR® shocks specifically to fit your ride. With over 30 years of automobile air suspension experience, Arnott has a deep understanding of the critical differences between air shocks designed for cars and those made for motorcycles, and our expert engineers translate decades of experience into the state-of-the-art air suspension kits.

Arnott Air Suspension kits for:
HARLEY-DAVIDSON® TRIKES

ACCESSIBLE ADVENTURE WITH THE ULTIMATE RIDE SERIES

The three-wheel movement is exploding in popularity, as trikes provide riders of all ages and their passengers with a more stable ride - and new opportunities to get out on the road! Upgrading your three-wheeler with our Ultimate Ride Series kit reduces painful bumps and bottoming over any road surface no matter how much weight is on board. Our extended shock length (14" vs. 13") increases ground clearance for exhaust tips, and prevents pipes from scraping on the pavement, as happens often with stock shocks.

PERFORMANCE MEETS PLEASURE

Arnett is constantly improving upon and developing new air suspension systems and components. We are pleased to support popular sport bikes such as the Kawasaki® Ninja® ZX™-14, Suzuki® Hayabusa® and Yamaha® FZ1. Arnett offers adjustable mono-shock kits to improve the ride and lower the bikes, making stopping and parking more secure – because everybody deserves this kind of quality.

SMOOTH RIDE SERIES

Great for your first air suspension upgrade, our economical Smooth Ride Series helps riders quickly adjust the bike's ride height for stopping and parking, at an unbeatable price. Optimized for each specific model, our kits provide a proven upgrade over stock shocks, and are far superior in quality and safety compared to other discount kits on the market.

The Smooth Ride Series features:

- **Monotube shocks engineered by Arnett®** specifically for motorcycles to provide a sporty, stock-like ride at an affordable price
- **A multi-ply Goodyear® air bladder** to provide height adjustability and additional air spring firmness to reduce bottoming and smooth out bumps
- **Micro compressor** and inflation control toggle switch quickly adjusts height
- Great option for shorter riders and those with mobility issues
