\$50 Each

Rear Shocks for SUVs with ADS Only

06-13 R-Class W251 Chassis

\$75 Each

Rear Shocks for SUVs with ADS Only

Many of the Mercedes rear shocks with ADS look very similar, including the 164 Chassis which we are **not** currently buying. Below are some side by side pictures to help ID them.

Below is a 251 Chassis rear on top and a 164 Chassis that we are not purchasing on the bottom. From the tip of the mount to the top of the shock body on the 251 is 14 1/4 inches. The 164 and 166 chassis both measure 16 1/2 inches. The bump stop on the 251 also looks different as you can see.

Above will help tell the 166 Chassis that we want from the 164 that we don't. You can tell by the bump stop and top mount. The picture above has a 166 on the left and a 164 on the right. The 166 has a thinner metal top mount. The 166 also has a flat surface at the bottom between the forks, and the 164 has a bulge from how it is assembled.
